“LIMITED LIFETIME WARRANTY”

This product is warranted to be free of manufacturing defects for the lifetime of the product.

□ Features -

Sessions and Hours Meter

Records the number of sessions and session hours in 2 separate memory meters, permanent (cannot be cleared) and resettable (user can clear) .

Bulb Life Meter and Alarm

User settable feature to monitor bed bulb life remaining. Meter can be read at anytime to see remaining bulb life. Alarm flashes when meter reaches zero usable bulb life hours left.

Pre-Start Delay

Pre-Start Delay allows the customer a predetermined amount of time to get ready before the session is started. Pre-start delay time can be set from 0 to 9.9 minutes. Setting this feature to zero will bypass the Pre-Start Delay.

Session Limit

This safety feature determines the maximum exposure time allowed on the sunbed. User settable up to the absolute Maximum allowed by the specific timer.

Pause

A session may be interrupted at any time by pressing the Start/Stop button. If the session is Paused for longer than 5 minutes the session is cancelled and the timer will be reset.

Clean Room

After each session the timer display will indicate that the sunbed has been used and is not ready for a new customer yet. Once the sunbed has been cleaned the indicator can be cleared either from the room or at the front desk. This feature is user selectable and may be turned ON/OFF.

PC Capable

The TT-1 Timer is “PC Capable” and can be “Computer Ready” with the purchase of a TTIO-5 PC Interface. Up to five TT-1 Timers can be connected to each TTIO-5 PC Interface allowing your TT-1 Timers to work with most salon software packages.

Safe TT Start™

This Feature determines how the sunbed will turn on. This feature is user selectable and may be turned ON/OFF. If this function is turned ON the sunbed will NOT start after the Pre-Start Delay has counted down or the timer is started by computer but will wait until the remote start/stop button is pushed in the room or on the timer.

TT-1 Timer System

Comes with all of the parts necessary to install and use the timer on most tanning beds.

(Sunbed must use an internal contactor. Maximum ratings, 5 Amps @ 220 VAC)

TT-1 System Includes: One TT-1 single station timer, one HVA-3 inroom remote control, one UL listed power supply, one 100' length of hookup wire, and a **“Limited Lifetime Warranty”**.
