### ***“LIMITED LIFETIME WARRANTY”***

This product is warranted to be free of manufacturing defects for the lifetime of the product.

#### **□ Features -**

##### **Sessions and Hours Meter**

Records the number of sessions and session hours in 2 separate memory meters, permanent (cannot be cleared) and resettable (user can clear).

##### **Bulb Life Meter and Alarm**

User settable feature to monitor bed bulb life remaining. Meter can be read at anytime to see remaining bulb life. Alarm flashes when meter reaches zero usable bulb life hours left.

##### **Pre-Start Delay**

Pre-Start Delay allows the customer a predetermined amount of time to get ready before the session is started. Pre-start delay time can be set from 0 to 9.9 minutes. Setting this feature to zero will bypass the Pre-Start Delay.

##### **Session Limit**

This safety feature determines the maximum exposure allowed on the sunbed connected to the timer. User settable up to the absolute Maximum allowed by the specific timer (varies with model).

##### **Pause**

A session may be interrupted at any time by pressing the Start/Stop button. If the session is Paused for longer than 5 minutes the session is cancelled and the timer will be reset.

##### **Clean Room**

After each session the timer display will indicate that the sunbed has been used and is not ready for a new customer yet. Once the sunbed has been cleaned the indicator can be cleared either from the room or at the front desk. This feature may be turned ON/OFF.

##### **Stop Event Alarm**

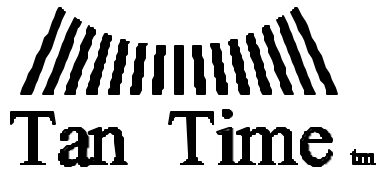

This feature will initiate a visual alarm upon pressing the inroom Start/Stop button while a session is in progress. This feature is user selectable and may be turned ON/OFF.

##### **Computer Ready**

The TT-5-PC is computer ready right out of the box and is compatible with most salon software programs. Front panel operation of the timer can be disabled for use with a computer only. This feature is user selectable and may be turned ON/OFF.

##### **Safe TT Start<sub>tm</sub>**

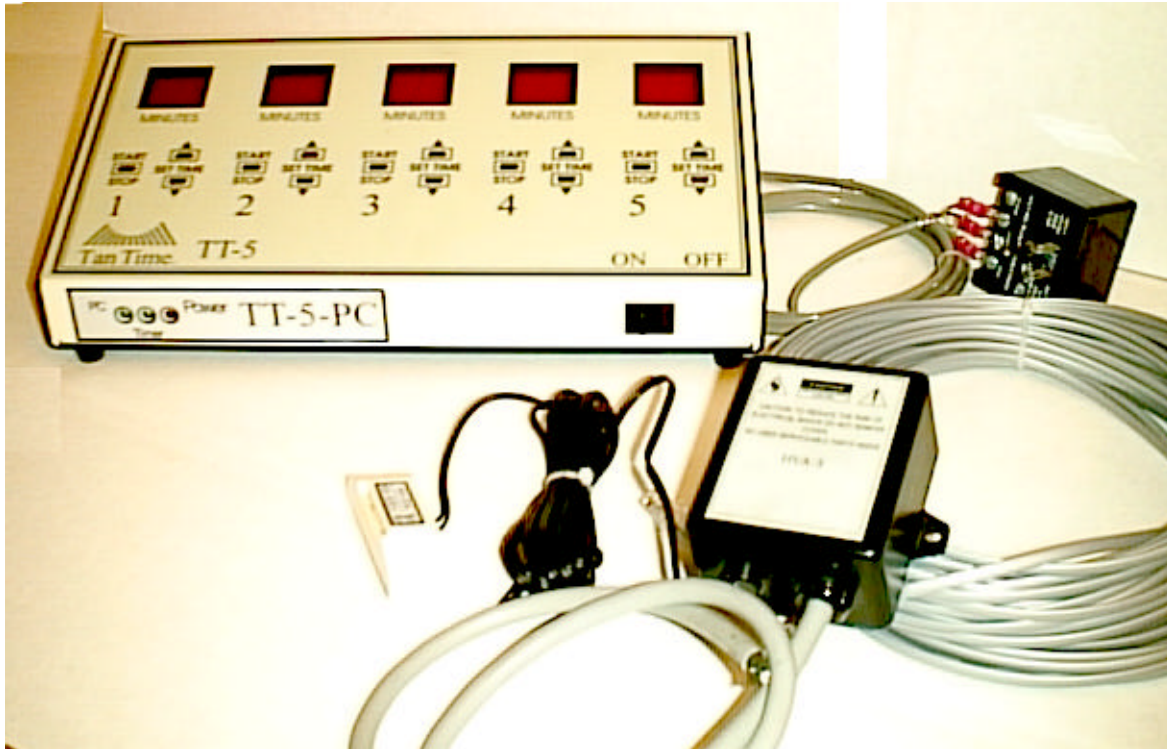

This Feature determines how the sunbed will turn on. This feature is user selectable and may be turned ON/OFF. If this function is turned ON the sunbed will NOT start after the Pre-Start Delay has counted down or the timer is started by computer but will wait until the remote start/stop button is pushed in the room or the start/stop button is pushed on the timer.

## TT-5-PC Timer System

Comes with all of the parts necessary to install and use the timer on up to five tanning beds.

(Sunbed must use an internal contactor. Maximum ratings, 5 Amps @ 220 VAC)
